

Innovative Engineer with a strong track record of taking complex data from research to production-grade deployment. Specialized in designing reliable agentic systems, robust MLOps workflows, and building data related products that prioritize accuracy and reliability.

EDUCATION

BA in Statistics and Computer Science *University Of Tehran* 2022 - 2026
Related Courses: DS, Machine Learning, Deep Learning, Advance Programming, Data Mining, AI, NLP, Data Engineering, Sampling, Experiments Design, Statistical Methods
GPA: 3.7/4

Mathematics Diploma *Farzanegan High-School* 2018 - 2022
GPA: 3.96/4

TECHNICAL EXPERIENCE

AI Engineer (Project) Aug 2026 – Present
KaveNegar *Tehran, Iran*

- Build AI-driven automation systems and intelligent agents using LLMs, RAG, tool calling, and workflow orchestration.
- Develop data pipelines and integrate AI systems with internal tools and business processes.

AI Engineer (Project) Jul 2026 – Aug 2026
AIIF – Azadi Innovation Center *Tehran, Iran*

- Developed a dynamic pricing system using market, competitor, and historical sales data to generate data-driven price recommendations.
- Applied machine learning, demand analysis, feature engineering, and pricing optimization to improve merchant pricing decisions.

AI Engineer Jan 2025 – May 2026
Wallex *Tehran, Iran*

- Developed ML and AI systems for financial risk assessment, transactional analysis, and decision support.
- Built AI assistants and automation agents using LLMs, RAG, tool calling, and financial/blockchain data.
- Experimented with data-driven trading agents and predictive financial models.

Data Scientist – AI Engineer Jul 2023 – Jan 2025
Divar *Tehran, Iran*

- Developed ML models for fraud detection, search ranking, recommendation, and marketplace analytics.
- Built semantic, vector, and multimodal search systems using NLP, embeddings, and image understanding.
- Developed AI agents for shopping assistance, content moderation, and internal engineering workflows.

““

Programming Tutor Summer 2022 — Summer 2024
Quera - Juniора - Abarkelas - Farzanegan Highschool

- Mentored students in algorithms, machine learning fundamentals and AI , and programming through project-based technical education.

TOOLS AND STACKS

Data & Analytics: SQL, PostgreSQL, ClickHouse, Elasticsearch, Data Analysis, Data Pipelines, Airflow, Metabase
Data Science & ML: Python, Scikit-learn, Pandas, NumPy, Classification, Regression, Predictive Modeling, Feature Engineering, Model Evaluation, Experimentation
Applied AI: LLMs, RAG, AI Agents, Embeddings, Semantic Search, Recommendation Systems, Prompt Engineering
Engineering: Docker, Kubernetes, Git, Linux, Model Deployment, Monitoring, Go, Redis, Kafka, rabbitMQ, CI/CD

ACTIVITIES

Sharif AI Hackathon - Second Place
Divar AI Contest - Lead
Torob AI Contest - Lead
Quera Tech Olympiad 2025 - Data Science Section Lead
Quera Tech Olympiad 2026 - Data Science Section Lead
Entrepreneurship Olympiad Medalist

COURSES

DeepLearning.AI: Machine Learning Specialization (Stanford University) - NLP Specialization - Vector Databases and Embeddings Applications - Evaluating AI Systems and Agents - MLOps Specialization

Hugging Face: NLP Course - Transformers Course - Agents Course

Google Cloud: Machine Learning Professional Certificate - 5-Day AI Agents Intensive Course

University of Helsinki (MOOC.fi): Elements of AI - Building AI - Deep Learning with PyTorch

IBM: AI Engineering Professional Certificate
